

Presidents of Hope and Change January 2010 Newsletter Issue #4

I'm up 38 articles on EzineArticles.com the marvelous website I mentioned last newsletter. It offers thousands of articles to read on myriad subjects. If you are interested, all my articles are featured on the Presidents of Hope and Change website under the tab [ARTICLES](#) and will continually update as my new articles are posted. To view them, just click on the E-Zine Expert logo to go direct to [EzineArticles.com](#). Because some of my favorite things to do are researching, writing and teaching, I'm having a great time and I'm giving something back. I'm in the middle of another book on a similar subject with several more books waiting in line.

I hope you and yours have had a wonderful holiday season and a happy, healthy and successful New Year.

Communication is a necessary and primary skill in life. The old truism "No man is an island" is particularly appropriate in a world that is developing porous borders. This will make our communication skills crucial as we cross the barriers of culture, society, language, philosophy and religion...

[Black and White Thinking - Look For Shades of Gray](#)

Would you like to engage in an exercise in futility, an absolutely useless and pointless activity? Try arguing with a closed mind. By the way, that does include both sides of the argument, the side you're on and the opposing view. It will not matter on which side you sit if one of the sides is locked in rigid thinking or behavior; the option of discussion simply does not exist.
