A very surprised president accepted the award, said he was humbled by the honor and by the august body of past winners. Instant political controversy brewed. Four U.S. presidents and one vice-president have received the Nobel Peace Prize, an amazing honor for these men and for their country. What can we see from the presidents' individual charts to indicate such honor and what might the four have in common in their charts? [November 02, 2009 02:14:05 pm]
