Astrologer surprises with analysis of presidents

**PRESIDENTS OF HOPE AND CHANGE**

**Bringing Hope to our Future by Reaching into our Astrological Past**

**By Marilyn Muir**

According to Michael Munkasy, “astrologer, author and researcher,” in his introduction for “Presidents of Hope and Change” (Future Strategies Publishing Inc., \$19.95) author Marilyn Muir has carefully researched and studied the astrological charts of the presidents of the past 200 years. Muir’s documented book claims to uncover an underlying set of political patterns upon which astrological signs seem to have significant bearing. The author then uncovers a consistent set of almost a dozen sets of fundamental “energies” that almost all 43 elected presidents embodied. She focuses on four of these leaders, and compares the mutual political challenges and similarities of their tenures in office. She concentrates on Thomas Jefferson, Abraham Lincoln, John F. Kennedy and Barack Obama. Through her analyses she sees a connecting strong lineage in the astrological charts of all four. She backs up her claims with logic based on her experience as an astrologer. If you are a believer in the influence of the stars — perhaps even consulting your daily horoscope — you may find “Presidents of Hope and Change” a fascinating book. Muir details her findings with carefully delineated charts, which, it appears, could really be appreciated only by those who follow and understand this persuasion.
